In 1918, while Europe burned, a Benedictine monk at Buckfast Abbey sat down to answer a question that most modern Christians have stopped asking:

How do you tell a true movement of the Spirit from a false one?

Dom Savinien Louismet was not an armchair theologian. He was a monk who had spent decades in prayer, study, and the warfare of the interior life. He watched the same confusion we see today — and traced it to a single root: the Church had forgotten how the mystical life actually works.

Twenty chapters on sin, demonic activity, the discernment of spirits, and the slow death of tepidity.
